

EOS MASTER SYSTEM REPORT

Field	Value
Report ID	EOS-MSR-2026-09-01-001
Audit ID	AUD-EOS-MASTER-20260901-021328Z
Classification contract	Every fact carries an epistemic label. Estimated $\neq$ measured. Reported $\neq$ verified. Code existence $\neq$ operational capability.
Mode	READ_ONLY / SAFE_VERIFICATION (report artifacts only)
Generated (UTC)	2026-09-01T02:18:00Z
Repository	https://github.com/valentinflorezarbelaez-ai/Eos-
Absolute path on this VM	/workspace
Started-from branch / HEAD	main / 24b69689c447f94afebd4893f5f0f83f45e0a823
Artifact branch	cursor/eos-master-system-report-21fb

Verdict (only one letter)	D — NOT_READY
---------------------------	---------------

Footnotes: every quantitative cell cites docs/reports/eos/master/raw/ or a command in §52. Charts live in charts/ with provenance captions.

1. Report metadata

Item	Value	Class	Source	Timestamp UTC	Method
OS	Linux 6.12.94+ x86_64	MEASURED	uname -a	2026-09-01T02:14:28Z	shell
Node	v22.14.0	MEASURED	node -v	2026-09-01T02:14:28Z	shell

Commits on HEAD lineage	75	MEASURED	git rev-list --count HEAD	2026-09-01T02:16:34Z	git

Tracked files	1048	MEASURED	`git ls-files`	wc -l`	2026-09-01T02:16:34Z	git
---------------	------	----------	----------------	--------	----------------------	-----

Working tree at audit start: **clean** on main (git status --porcelain empty). During generation: untracked docs/reports/ only. OBSERVED.

Chrome present at /usr/bin/google-chrome (MEASURED) — used only later for optional PDF print of this report.

2. Epistemic contract and label legend

Labels used in this report (user brief):

VERIFIED · OBSERVED · MEASURED · REPRODUCED · REPORTED · INFERRED · HYPOTHESIS · UNKNOWN · NOT_RUN · NOT_REPRODUCIBLE · BLOCKED · CONTRADICTED

Rules applied:

1. A number without command + timestamp + method is not printed as measured.
 2. `verify:strict` passing is **not** test coverage and **not** production readiness.
 3. Previous-memory figures (726/726, 615/615) are **not** copied forward. They are in §46 if they differ from this tree.
 4. Dashboard states are VERIFIED / STRONG / PARTIAL / UNKNOWN / BLOCKED / NOT_READY (plus CONTRADICTED where required). **No completeness percentage is computed.**
-
-

3. Scope, method, non-goals

In scope: static/AST-ish import scan, git inspect, filesystem inventory, ESM import of **pure** kernel modules, `verify-eos --strict` (no writes), document-vs-tree comparison.

Out of scope / NOT_RUN: `npm test`, `test:lab`, `test:all`, `node bin/eos.js` (constructor `mkdirSync('.missions')`), MCP stdio server, network, `npm install`, mutation of Foundation/CORE/product, coverage, performance profilers, browser product QA (there is no product UI in Fundacion/).

Non-goals: improving architecture, renaming files, changing dependencies, merging this PR.

4. Environment of observation

This audit ran on a Linux Cloud Agent VM (cursor, kernel 6.12.94+, user ubuntu). Windows paths in the registry (`C:\Users\valen\Documents\Fundacion`) **do not exist** here (OBSERVED). `.cursor/mcp.json` points engram at `C:\Users\valen\go\bin\engram.exe` — not operational on this VM (OBSERVED).

5. Executive dashboard

No completeness %. States below are labels, not scores.

Surface	State	Proof
File/JSON gate (verify:strict)	VERIFIED	471/471, exit 0, 32 ms, 2026-09-01T02:15:34Z
Mission OS source (src/core)	STRONG	22 files, import of FSM/HITL succeeded
Product test suite	NOT_READY	NOT_RUN
Published test-health telemetry	CONTRADICTED	20 / 471 / 472 / 608 / 663 / 777
Production readiness	NOT_READY	Dictamen NO + this audit
Local-complete freeze paperwork	PARTIAL	REPORTED YES on SHA 78b28d6; HEAD is 24b69689
External MCP “CONNECTED”	UNKNOWN	Not observed; Windows binary
PRJ-FUNDACION	NOT_READY	Empty dir; GAP-002 UNKNOWN
CORE freeze as single inode	UNKNOWN	scripts/engine/core missing
Security Step-9 matrix vs tree	CONTRADICTED	Target modules absent
Dependency surface (npm)	STRONG	0 dependencies; no lockfile needed for builtins

Git hygiene at start	VERIFIED	Clean main, 75 commits, 1 RC tag
----------------------	----------	----------------------------------

Chart: charts/dashboard_state_histogram.svg

6. One-page system snapshot

EOS in this repository is a **documentation-heavy Node.js control plane** plus a **local Mission OS kernel** under src/core, plus a **larger parallel factory** under scripts/engine. package.json name eos-system version 0.3.0, type: module, **20 scripts, no dependencies**.

Two CLIs exist: bin/eos.js → MissionCLI / MissionRuntime; scripts/cli/eos.js → Cursor harness with a **hardcoded fallback** 608 / 608 PASS.

No .missions/ directory. No node_modules/. Fundacion/ exists and is empty.

7. Inventory — filesystem

Class	Files	Bytes	Class.
docs	651	1930920	MEASURED
tests	163	527460	MEASURED
scripts	107	613812	MEASURED
eos-lab	64	625146	MEASURED
src	22	243380	MEASURED
agents-dot	10	13862	MEASURED

| mission-control | 9 | 7661 | MEASURED |

| root-other | 8 | 22705 | MEASURED |

| luxe-registry | 4 | 18303 | MEASURED |

| multimodal | 4 | 17015 | MEASURED |

| cursor | 3 | 3203 | MEASURED |

bin	1	557	MEASURED
-----	---	-----	----------

Total product files (exclude docs/reports): 1046 files, 4024024 bytes. MEASURED 2026-09-01T02:17:03.300Z
· raw/product_baseline_inventory.json.

git ls-files | wc -l = **1048** tracked (MEASURED). Difference vs 1046 walk: tracked includes git-only paths / walk skips .git; walk may see untracked non-report files. Do not treat as error without a join.

Chart: charts/inventory_by_class.svg

8. Inventory — source vs docs vs tests vs scripts

Layer	Files	Lines (loc walk)	Class
src/	22	6323	MEASURED
scripts/	107	15978	MEASURED
tests/	163	12502	MEASURED

docs/	651	— (not LOC-scanned as code)	MEASURED
-------	-----	-----------------------------	----------

Docs are **651 / 1046 ≈ 62.2% of file count**. This is a **file-count ratio**, not a quality or completeness score. INFERRED arithmetic on MEASURED counts.

Chart: charts/loc_by_layer.svg

9. Inventory — config and governance artifacts

Observed at repo root: CONSTITUTION.md, DEPENDENCY_POLICY_L0.md, CLEAN_CLONE.md, RC_FILE_MANIFEST.json, package.json, .cursorrules, .gitignore, .editorconfig.

EOS-MISSION-CONTROL/: 9 JSON files including CURRENT_MISSION.json, CURRENT_STATE.json, BUDGET.json, RISK.json, ACTIVE_AGENTS.json, ACTIVE_TOOLS.json. OBSERVED.

docs/ contains architecture, audits, evidence, governance, intake, intelligence, knowledge, missions, orchestration, policies, projects, releases, schemas, skills, specs, tools, workflows. OBSERVED via directory listing.

10. Topology

Chart: charts/inventory_by_class.svg · graph JSON: EOS_MASTER_DEPENDENCY_GRAPH.json

11. Documented architecture

Documents describe (REPORTED, not re-verified as operational):

- An Engineering Operating System / control plane with 21-step pipeline (.agents/AGENTS.md, CONSTITUTION.md).
- Mission OS local-complete freeze: COMPLETE_FOR_LOCAL_GOVERNED_USE: YES, PRODUCTION_READY: NO (docs/releases/*, CURRENT_MISSION.json).
- CORE FROZEN, Fundación $\Delta=0$, GAP-002 UNKNOWN (mission-control + cursorrules).
- A Step-9 security suite remediating src/core/synthesisEngine.js and src/core/executionOrchestrator.js (docs/evidence/EOS_STEP_9_SECURITY_MATRIX.json).
- External MCPs CONNECTED (Engram, Playwright, Context7, Trello, Slack, Jira, Figma, Stitch) in ACTIVE_TOOLS.json.

- scripts/engine/core/** as FROZEN_CORE_KERNEL (RISK.json).

12. Actual architecture (this tree, this VM)

OBSERVED / MEASURED:

- Kernel that **exists**: src/core/** 22 JS files (runtime, ATS, FSM, HITL, integration gate, MCP bridge, tutor, schemas, rules, discovery, supervision, economics).
- Parallel factory that **exists**: scripts/engine/ **100+ JS engines including** duplicate basenames** sdd-fsm-engine.js, hitl-gatekeeper.js, epistemic-evidence-engine.js.
- Modules that **do not exist**: src/core/synthesisEngine.js, src/core/executionOrchestrator.js, scripts/engine/core/.
- Runtime store .missions/ **absent**.
- Fundacion/ **empty**. Windows Fundación path **absent**.
- npm graph: **no dependencies field, no lockfile, no node_modules**.

13. Documented vs actual delta

Documented	Actual on this VM	Label
main = 78b28d6 (freeze gate)	HEAD = 24b69689c447f94afebd4893f5f0f83f45e0a823	CONTRADICTED
tests 20/20 at freeze	Suite not run; static 777 calls	REPORTED vs NOT_RUN
test_health 663/663	Not reproduced	REPORTED
verify 472/472 (many audits)	471/471 this run	CONTRADICTED vs historical
CORE at scripts/engine/core	Path missing	CONTRADICTED
synthesisEngine remediations	File missing	CONTRADICTED
MCP CONNECTED	No handshake; Windows engram	CONTRADICTED / NOT_OBSERVED
726/726 or 615/615	Zero file hits	CONTRADICTED (memory vs tree)

Fundación product	Empty folder	OBSERVED
-------------------	--------------	----------

14. Entrypoints

Entrypoint	Target	Class	Run this audit
bin/eos.js	MissionCLI	OBSERVED	NOT_RUN (mkdir .missions)
npm run eos:mission	node bin/eos.js	OBSERVED	NOT_RUN
npm run eos	scripts/cli/eos.js	OBSERVED	NOT_RUN
npm run mcp:start	src/mcp-server.js	OBSERVED	NOT_RUN
npm test	node --test tests/**	OBSERVED	NOT_RUN
npm run verify:strict	scripts/verify-eos.js --strict	MEASURED	exit 0, 471 checks

.cursor/mcp.json eos-local	node src/mcp-server.js	OBSERVED	NOT_RUN
----------------------------	------------------------	----------	---------

MissionCLI.getHelp() text (OBSERVED by reading source) advertises: create, inspect, plan, package, status, report, verify, pause, resume, close. Subcommands submit/ingest and role exist in code but are omitted from the help banner (OBSERVED).

15. MissionRuntime

File: src/core/runtime/mission-runtime.js (OBSERVED).

Methods parsed (raw/mission_runtime_methods.json): constructor, getMissionDir, _updateManifestFile, createMission, inspectMission, planMission, _advanceToPlanViaCanonicalFsm, _writeMissionArtifact, packageMission, reportMission, verifyMission, pauseMission, resumeMission, closeMission, submitReturnPackage.

Constructor **creates** .missions if missing (OBSERVED). Therefore constructing the runtime is a filesystem mutation. This audit did **not** construct it. Operational capability: UNKNOWN / NOT_RUN.

No mission artifacts on disk: .missions absent (OBSERVED).

16. FSM

Imported from src/core/sdd/sdd-fsm-engine.js without constructing MissionRuntime (OBSERVED / ESM import; see raw/kernel_exports.json).

States (17): VISION_INTAKE, MISSION_FORMULATION, HUMAN_DIRECTION_GATE, DISCOVER, DEFINE, PLAN, DELEGATE, SUPERVISE, VERIFY, REVIEW, HUMAN_RELEASE_GATE, OPERATE_AND_LEARN, PAUSED, BLOCKED, FAILED, CANCELLED, COMPLETED.

Canonical transitions: 16 (raw/kernel_exports.json).

HITL-required examples (OBSERVED in export): HUMAN_DIRECTION_GATE ← human.approve_direction; further HITL gates exist on release (raw/kernel_exports.json).

A second file `scripts/engine/sdd-fsm-engine.js` exists (OBSERVED). Which copy is used depends on importer. Mission OS uses `src/core`. Legacy factory may use `scripts/engine`. This is a dual-source risk (INFERRED from path existence).

17. Authority / HITL

`AuthorityTruthSource (src/core/authority/authority-truth-source.js)`: comments state it is the sole phase writer via `commitTransition()` (OBSERVED as source text, not executed).

`HitlGatekeeper` autonomy modes (OBSERVED import): `READ_ONLY_AUTONOMOUS`, `LOCAL_BOUNDED_AUTONOMY`, `STAGED_AUTONOMY`, `PRODUCTION_SUPERVISED`.

Human-only actions (OBSERVED): `HUMAN_DIRECTION_GATE`, `HUMAN_RELEASE_GATE`, `human.approve_direction`, `human.approve_release`, `scope.expand`, `surface.modify_protected`, `environment.production_release`, `credentials.access`, `external.message_publish`, `constitution.exception`.

Runtime exercise: `NOT_RUN`. Therefore “HITL cannot be bypassed” is **not** VERIFIED this audit.

18. Tools / MCP

Declared in `src/mcp-server.js` (OBSERVED, n=20):

Tool	Side effects	Auth
<code> eos.mission.resolve</code>	<code> NONE</code>	<code> A0</code>
<code> eos.mission.start</code>	<code> LEDGER_WRITE</code>	<code> A1</code>
<code> eos.mission.status</code>	<code> READ_ONLY</code>	<code> A0</code>
<code> eos.mission.recover</code>	<code> LEDGER_WRITE</code>	<code> A1</code>
<code> eos.context.compile</code>	<code> READ_ONLY</code>	<code> A0</code>
<code> eos.ledger.get_features</code>	<code> READ_ONLY</code>	<code> A0</code>
<code> eos.ledger.update_feature</code>	<code> LEDGER_WRITE</code>	<code> A1</code>
<code> eos.authority.check</code>	<code> READ_ONLY</code>	<code> A0</code>
<code> eos.policy.validate</code>	<code> READ_ONLY</code>	<code> A0</code>
<code> eos.evidence.record</code>	<code> LEDGER_WRITE</code>	<code> A1</code>
<code> eos.evidence.get</code>	<code> READ_ONLY</code>	<code> A0</code>
<code> eos.verifier.run</code>	<code> READ_ONLY</code>	<code> A0</code>
<code> eos.provider.route</code>	<code> READ_ONLY</code>	<code> A0</code>

| eos.provider.health | READ_ONLY | A0 |

| eos.workspace.discover | READ_ONLY | A0 |

| eos.workspace.barrier_check | READ_ONLY | A0 |

| eos.fdir.status | READ_ONLY | A0 |

| eos.fdir.trip | NONE | A2 |

| eos.audit.run | READ_ONLY | A0 |

eos.report.generate	READ_ONLY	A0
---------------------	-----------	----

.cursor/mcp-status.json (REPORTED 2026-08-21) lists the same wiring and marks eos.provider.route / eos.provider.health **not_configured**.

ACTIVE_TOOLS.json lists 8 third-party MCPs as CONNECTED (REPORTED). This VM: no live MCP handshake performed (NOT_RUN). engram.exe Windows path (OBSERVED). Treat CONNECTED as **not observed**.

docs/tools/REGISTRY.json lists 4 TOL-MOCK-* tools only (OBSERVED). Mock registry ≠ MCP server.

Default MCP env in .cursor/mcp.json: EOS_MODE=read-write, EOS_AUTONOMY_LEVEL=LEVEL_1 (OBSERVED). Server source defaults EOS_MODE to read-only if unset (OBSERVED). Configured Cursor mode is **less tight** than source default (INFERRED).

19. Governance matrix

Control	Artifact	Class	Note
Constitution	CONSTITUTION.md, docs/core/CONSTITUTION.md	OBSERVED	Evidence-over-claims articles
Mission freeze dictamen	CURRENT_MISSION.json	REPORTED	PRODUCTION_READY NO; local-complete YES
Write barrier	RISK.json, AGENTS.md	REPORTED	Fundación Windows path; canary write allow
Dependency policy	DEPENDENCY_POLICY_L0.md	REPORTED	NODE_BUILTINS_ONLY
verify:strict	executed	MEASURED	file/JSON gate
ATS/HITL/IG	source	OBSERVED	not executed

GATE-13	various audits	REPORTED	not independently re-derived
---------	----------------	----------	------------------------------

Autonomy advertised in CURRENT_STATE.json: LEVEL_2_SUPERVISED_AUTONOMY (REPORTED). This process did not assume that grant for product mutation.

20. Security matrix

docs/evidence/EOS_STEP_9_SECURITY_MATRIX.json (REPORTED 2026-08-11) claims 16/16 attacks blocked against src/core/synthesisEngine.js and src/core/executionOrchestrator.js.

Those files: **absent** (OBSERVED, raw/claimed_path_existence.json).

Therefore the matrix is **not applicable to the current kernel**. Classification: CONTRADICTED as a description of **this** tree.

IntegrationGatekeeper contains SSRF host denylist and secret regexes (OBSERVED source). Not dynamically tested (NOT_RUN).

Secrets heuristic: **10 files** matched generic api_key/secret/token/password = '...' (OBSERVED, values not stored). Likely fixtures. Not a professional scanner. See raw/secrets_heuristic.json.

21. Bypass register

ID	Surface	Class	Note
BYP-01	Dual kernel copies	OBSERVED	Importers of scripts/engine/hitl-gatekeeper.js may not share ATS
BYP-02	MissionRuntime constructor mkdir	OBSERVED	Help/status construction mutates disk
BYP-03	.cursor/mcp.json read-write LEVEL_1	OBSERVED	Looser than source default read-only
BYP-04	allowLocalDirectorReceipt default true	OBSERVED	Local fixture HITL receipts (documented in capability matrix)
BYP-05	Legacy npm run eos harness	OBSERVED	Not Mission OS; hardcoded 608/608 fallback
BYP-06	Direct pkg.phase writes	UNKNOWN	ATS comments forbid it; no runtime proof this audit

BYP-07	External MCP with filesystem write (Engram catalog)	REPORTED	NORMALIZED_MCP_CATALOG.json write_access true
--------	--	----------	--

No bypass **exploit** was developed or run. This is a **register of surfaces**, not a penetration test.

22. Evidence system

docs/evidence/ contains **84** JSON files (MEASURED). Schema file present. Contents are **historical REPORTED** receipts unless re-executed.

This audit's **new** evidence is only under docs/reports/eos/master/raw/.

CURRENT_STATE.last_telemetry_hash = 41e9b257... (REPORTED 2026-08-15). Not recomputed (NOT_RUN).

23. Testing inventory (count ≠ coverage)

Metric	Value	Class
*.test.js / *.test.ts files	132	MEASURED
tests/**/*.test.js	122	MEASURED
EOS-Lab *.test.ts	2	MEASURED
Static test(+ it(calls	777	MEASURED
Test files mentioning write APIs	10	MEASURED
Coverage %	—	NOT_RUN

Executed passing tests this audit	—	NOT_RUN
-----------------------------------	---	---------

npm test glob: tests/*.test.js tests/**/*.test.js. test:lab needs npx tsx and missing node_modules (OBSERVED).

Count is not coverage. Inventory is not execution.

24. Testing execution results

Suite	Result	Exit	Duration	Class
node scripts/verify-eos.js --strict --json	PASS 471 checks	0	32 ms	MEASURED
node scripts/verify-eos.js --strict	PASS 471	0	29 ms	MEASURED
npm test	—	—	—	NOT_RUN
Freeze 4-file suite (historical 20/20)	—	—	—	NOT_RUN

test:lab / test:all	—	—	—	NOT_RUN
---------------------	---	---	---	---------

Rationale for NOT_RUN: user brief — run tests only if clearly non-mutating. 10 test files mention write APIs; many engines persist docs/evidence; MissionRuntime writes .missions.

25. V&V

Activity	Status
Static inventory + import graph	MEASURED
Pure-module ESM import (FSM/HITL/IG)	OBSERVED
verify:strict	MEASURED
Unit/integration tests	NOT_RUN
Independent second-party replay of freeze suite	NOT_RUN
Runtime V&V of a mission	NOT_RUN

Production monitoring	NOT_OBSERVED
-----------------------	--------------

verify:strict composition (MEASURED): existence 276, json-validity 187, frontmatter 8. Chart: [charts/verify_strict_breakdown.svg](#).

Historical audits claiming **472/472** (REPORTED in multiple docs/audits/*) **do not match** this run's **471**. Classification: CONTRADICTED (historical vs current). Cause not bisected (UNKNOWN).

26. Reproducibility pipeline

Element	Status
Clean-clone markdown	CLEAN_CLONE.md OBSERVED
Lockfile	ABSENT — consistent with L0 builtins REPORTED/OBSERVED
Node builtins-only core	OBSERVED for src/ imports (node:*)
EOS-Lab external specs (hono, astro, zod, vitest)	OBSERVED in import graph; not installed
RC manifest	RC_FILE_MANIFEST.json REPORTED file_count 42 for a packaging subset

This audit	Raw traces in raw/ allow re-count of every printed number
------------	---

Full product reproducibility including EOS-Lab: BLOCKED without installs (forbidden this mission).

27. Git health

Metric	Value	Class
Commits	75	MEASURED
First commit	8c52375 · 2026-08-10T17:12:58-05:00	MEASURED
Authors on HEAD	Valentin Florez 75	MEASURED
--all shortlog extra	Cursor Agent 171 (other refs)	OBSERVED
Tags	rc/eos-mission-os-local-complete-2026-08-21	MEASURED
Remote	github.com/valentinflorezarbelaez-ai/Eos-	OBSERVED

Start dirty files	0	MEASURED
-------------------	---	----------

Commits by date: 2026-08-10:32, 08-11:14, 08-15:15, 08-19:4, 08-21:10. Chart: charts/git_commits_by_date.svg.

Eleven calendar days of history. High documentation volume relative to time (INFERRED).

28. Code health

- src 22 files / 6323 lines / 40 fn-like regex hits (MEASURED; **not** cyclomatic).
- scripts 107 files / 15978 lines / 179 fn-like.
- Scripts are ~2.5× **lines of src**. Dual-plane maintenance cost INFERRED.
- Lint / typecheck / mutation testing: NOT_RUN (no eslint config observed in root listing; no TS on kernel).
- Duplicate kernel basenames: **3** (MEASURED).

29. Dependency health

package.json has **no** dependencies or devDependencies (OBSERVED).

Import-graph package specs (MEASURED): Node builtins dominate (node:fs 143, node:path 143, node:test 131, node:assert 132). Non-node names seen in tree: hono, @hono/node-server, zod, vitest, astro — **EOS-Lab / fixtures**. Those packages are **not installed** (node_modules absent). Import spec ≠ runnable dependency.

30. Agents

Two catalogs (OBSERVED):

1. docs/agents/REGISTRY.json — **16** agents (Product ... Governance Auditor). Updated 2026-08-10. REPORTED roles.

2. EOS-MISSION-CONTROL/ACTIVE_AGENTS.json — 7 agents (Executive, Researcher, Architect, Implementer, Tester, Auditor, Redteam), statuses IDLE/STANDBY. REPORTED.

No agent processes were observed running (NOT_OBSERVED). Skills exist under .agents/skills/ (8 SKILL.md files in verify frontmatter set).

31. Knowledge plane

docs/knowledge/, docs/intelligence/, research RSC-0001... files exist and verify:strict JSON-validated many of them (MEASURED as files). Claims inside research JSON remain REPORTED. No knowledge-query engine was executed (NOT_RUN).

32. Ops maturity

Mission-control JSON looks like an ops console but is **static files**. system_status: ONLINE is REPORTED (2026-08-15), not a probed service.

BUDGET.json current_usage tokens 45200 / \$0.32 / 32100 ms: **REPORTED**, not reproduced. Do not use as measured cost.

Incidents file exists (EOS-MISSION-CONTROL/INCIDENTS.json) — not treated as live IR.

33. Performance

No runtime performance was measured. Core Web Vitals, LCP, CLI latency (except verify 32 ms), MCP RTT: NOT_RUN.

The 32 ms / 29 ms figures apply **only** to verify-eos.js, a filesystem walker.

BUDGET.json times are REPORTED.

This section intentionally has **no invented SLOs**.

34. Complexity

Signal	Value	Class	Caveat
Import edges	1135	MEASURED	regex, may miss
JS/TS scanned	308	MEASURED	
src fn-like	40	MEASURED	not cyclomatic
scripts fn-like	179	MEASURED	not cyclomatic

Duplicate kernel files	3	MEASURED	
------------------------	---	----------	--

No McCabe/tooling run (NOT_RUN).

35. Fitness functions

The closest executed fitness function is `verify-eos --strict`: **file presence** + **JSON parse** + **skill frontmatter**. It does **not** evaluate missions, security, or user value.

`package.json` also advertises `evaluate:self`, `evaluate:release`, `audit:system`, `prove:factory` — **NOT_RUN** (likely write telemetry).

36. Projects

`docs/projects/registry.json` lists **6** projects (OBSERVED): PRJ-EOS-CONTROL-PLANE, PRJ-FUNDACION, PRJ-LUXE-REGISTRY, PRJ-MULTIMODAL-CREATIVE, PRJ-RESEARCH-INTEL, PRJ-CANARY-ALPHA.

ID	Registry path	On this VM
PRJ-EOS-CONTROL-PLANE	Windows Eos system	/workspace is a clone, not that path
PRJ-FUNDACION	C:\Users\valen\Documents\Fundacion	missing; Fundacion/ empty
PRJ-LUXE-REGISTRY	Windows Luxe-Registry	in-repo Luxe-Registry/ 4 files
PRJ-MULTIMODAL-CREATIVE	Windows suite	in-repo 4 files
PRJ-RESEARCH-INTEL	Windows path	not present as tree

PRJ-CANARY-ALPHA	Windows EOS-Lab path	EOS-Lab/Canary-Alpha exists (64 lab files total across EOS-Lab)
------------------	----------------------	---

Registry `business_status` `PRODUCTION_READY_WITHIN_TESTED_SCOPE` for Luxe/Multimodal is **REPORTED** (2026-08-11) and is **not** this audit's verdict.

37. Historical trajectory

MEASURED commit histogram shows a burst 10–21 Aug 2026 (75 commits). Tag RC 2026-08-21. HEAD after merge adds MCP wiring (`feat(mcp): wire MissionRuntime...`).

Freeze paperwork was **not updated** to the MCP commit (CONTRADICTED SHA).

38. Risk register (P0–P3)

See `EOS_MASTER_RISK_REGISTER.json`. Summary:

- **R-P0-01 [P0]** Stale/contradictory system-health pass counts used as live telemetry — CONTRADICTED — `CURRENT_STATE.json` 663/663; `scripts/cli/eos.js` fallback 608/608; freeze 20/20; static 777 calls; 726/726 and 615/615 absent
- **R-P0-02 [P0]** Security remediations cite modules that do not exist — CONTRADICTED — `docs/evidence/EOS_STEP_9_SECURITY_MATRIX.json` → `src/core/synthesisEngine.js`, `executionOrchestrator.js`
- **R-P0-03 [P0]** npm test not executed; mutation risk in suite — NOT_RUN — 10 test files mention write APIs; `MissionRuntime` persists `.missions`
- **R-P1-01 [P1]** Dual kernel copies (`src/core` vs `scripts/engine`) — OBSERVED — `duplicate_module_basenames.json` count=3
- **R-P1-02 [P1]** MCP CONNECTED claims vs this environment — CONTRADICTED — `ACTIVE_TOOLS.json` vs `.cursor/mcp.json` Windows `engram.exe` path
- **R-P1-03 [P1]** Freeze documents pin stale main SHA — CONTRADICTED — `EOS_FREEZE_GATE_STATUS.md` main=78b28d6; HEAD=24b6968
- **R-P1-04 [P1]** PRJ-FUNDACION empty; GAP-002 still UNKNOWN — OBSERVED — `Fundacion/` empty; `MASTER_UNKNOWN_REGISTER.json`
- **R-P1-05 [P1]** CLI constructor creates `.missions` as side effect — OBSERVED — `mission-runtime.js` `mkdirSync`
- **R-P2-01 [P2]** Registry paths are Windows absolute and invalid on this VM — OBSERVED — `docs/projects/registry.json`
- **R-P2-02 [P2]** Budget/usage telemetry not reproduced — REPORTED — `EOS-MISSION-CONTROL/BUDGET.json`
- **R-P2-03 [P2]** `RISK.json` freezes `scripts/engine/core` which does not exist — CONTRADICTED — `EOS-MISSION-CONTROL/RISK.json`
- **R-P2-04 [P2]** Historical `PRODUCTION_READY` verdicts inside EVD-0033/34/35 — REPORTED — `docs/evidence`
- **R-P2-05 [P2]** Heuristic secret-like assignments in `tests/engines` — OBSERVED — `raw/secrets_heuristic.json` 10 files
- **R-P3-01 [P3]** Docs dominate inventory (651/1046 files) — MEASURED — `product_baseline_inventory.json`
- **R-P3-02 [P3]** No lockfile under L0 policy — OBSERVED — `DEPENDENCY_POLICY_L0.md`
- **R-P3-03 [P3]** sqlite artifacts in EOS-Lab — OBSERVED — `inventory.db` `.db-wal` `.db-shm`

Chart: `charts/risk_severity_counts.svg`

39. Do-not-build register

- **Production deploy / public hosting** — PRODUCTION_READY=NO; no network/prod capability verified (NOT_READY)
- **Unattended LEVEL_3+ autonomy on real client targets** — HITL/ATS not exercised this audit; Fundacion barrier exists (NOT_READY)
- **Infer GAP-002 legal/banking data** — Explicit constitutional unknown (BLOCKED)
- **Treat verify:strict 471 as test coverage or runtime health** — Path/JSON existence only (INFERRED)
- **npm install / add dependencies without L1/L2 policy** — DEPENDENCY_POLICY_L0 (REPORTED)
- **Merge or claim freeze paperwork still equals HEAD** — 78b28d6 ≠ 24b6968 (CONTRADICTED)
- **Operate claimed CONNECTED third-party MCPs from this Linux VM as if live** — Not observed; Windows engram path (NOT_OBSERVED)
- **Cite 726/726 or 615/615 as current facts** — Strings absent in tree; previous-memory only (CONTRADICTED)

40. Capability matrix

Rule: **code existence ≠ operational capability**. Full table: EOS_MASTER_CAPABILITY_MATRIX.json.

ID	Name	Code/doc status	Operational
CAP-CLI-MISSION	Mission CLI (bin/eos.js → MissionCLI)	OBSERVED	UNKNOWN
CAP-MISSION-RUNTIME	MissionRuntime lifecycle	OBSERVED	NOT_RUN
CAP-ATS	AuthorityTruthSource commitTransition	OBSERVED	NOT_RUN
CAP-FSM	SDD FSM TransitionEnforcer	OBSERVED	NOT_RUN
CAP-HITL	HitlGatekeeper receipts	OBSERVED	NOT_RUN
CAP-IG	IntegrationGatekeeper / FDIR	OBSERVED	NOT_RUN
CAP-MCP-LOCAL	eos-local MCP server	OBSERVED	NOT_RUN
CAP-MCP-EXTERNAL	Engram/Playwright/Figma/Slack MCP	REPORTED	NOT_OBSERVED
CAP-VERIFY-STRICT	verify-eos --strict path/JSON gate	VERIFIED	MEASURED
CAP-NPM-TEST	npm test suite	NOT_RUN	UNKNOWN
CAP-LEGACY-FACTORY	scripts/engine autonomous factory	OBSERVED	NOT_RUN
CAP-FUNDACION	PRJ-FUNDACION product site	NOT_READY	NOT_OBSERVED
CAP-LUXE	Luxe-Registry in-repo tree	OBSERVED	UNKNOWN
CAP-MULTIMODAL	Multimodal-Creative-Suite in-repo tree	OBSERVED	UNKNOWN
CAP-CANARY-LAB	EOS-Lab canaries	OBSERVED	NOT_RUN

| CAP-COVERAGE | Test coverage measurement | NOT_RUN | UNKNOWN |

| CAP-PERF | Runtime performance telemetry | NOT_RUN | UNKNOWN |

CAP-PROD-DEPLOY	Production deploy / network / credentials	NOT_READY	BLOCKED
-----------------	---	-----------	---------

Chart: charts/capability_operational.svg

41. Readiness assessment

Question	State
Ready for production users?	NOT_READY
Ready for unattended autonomy?	NOT_READY
Ready as a local file/JSON governed workspace?	PARTIAL (verifier works; runtime unproven this audit)
Ready to mutate Fundación?	NOT_READY / BLOCKED

Ready to claim local-complete on *this* HEAD?	UNKNOWN (paperwork is for another SHA; tests NOT_RUN)
---	---

42. Radar — Graph 29

Ordinal mapping used **only for charts/radar_graph_29_ordinal.svg**: VERIFIED/MEASURED=5, STRONG/OBSERVED=4, PARTIAL=3, REPORTED=2, UNKNOWN/BLOCKED/NOT_RUN=1, NOT_READY/CONTRADICTED=0.

This mapping is not a KPI and must not be averaged into a fake %.

#	Dimension	State	Note
---	-----------	-------	------

| 1 | 01 Architecture coherence | PARTIAL | Dual planes src/core vs scripts/engine; 3 duplicate kernel basenames |

| 2 | 02 Documented vs actual | CONTRADICTED | Security matrix cites missing
synthesisEngine/executionOrchestrator; freeze HEAD stale |

| 3 | 03 Entrypoints | PARTIAL | bin/eos.js and scripts/cli/eos.js both exist; CLI --help not executed (mkdir side
effect) |

| 4 | 04 MissionRuntime | OBSERVED | Class and methods exist; no .missions; constructor not invoked this audit |

| 5 | 05 FSM | OBSERVED | 17 states, 16 transitions imported from src/core/sdd/sdd-fsm-engine.js |

| 6 | 06 Authority / HITL | OBSERVED | ATS + HitlGatekeeper modules exist; runtime not exercised |

| 7 | 07 Tools / MCP | PARTIAL | 20 tools declared in src; MCP CONNECTED claims not observed on this VM |

| 8 | 08 Governance matrix | PARTIAL | Policies and RISK.json exist; frozen-core path scripts/engine/core missing |

| 9 | 09 Security matrix | CONTRADICTED | EOS_STEP_9_SECURITY_MATRIX.json remediates files that do not exist |

| 10 | 10 Bypass resistance | UNKNOWN | Guards exist in source; bypass suite not executed this audit |

| 11 | 11 Evidence system | PARTIAL | 84 evidence JSON files exist; contents treated as REPORTED |

| 12 | 12 Testing inventory | MEASURED | 132 test-like files; 777 static test()/it() calls; count ≠ coverage |

| 13 | 13 Testing execution | NOT_RUN | npm test / test:all / coverage not executed |

| 14 | 14 V&V | PARTIAL | verify:strict MEASURED; dynamic V&V NOT_RUN |

| 15 | 15 Reproducibility | PARTIAL | L0 builtins policy + no lockfile; clean-clone of core is plausible, not replayed |

| 16 | 16 Git health | STRONG | 75 commits, 1 tag, clean start, remote origin present |

| 17 | 17 Code health | PARTIAL | src 22 files / 6323 lines; scripts 3.4x larger; lint/typecheck NOT_RUN |

| 18 | 18 Dependency health | STRONG | No npm dependencies in package.json; node_modules absent |

| 19 | 19 Agents | REPORTED | 16 docs agents + 7 mission-control agents; no live process observed |

| 20 | 20 Knowledge plane | REPORTED | docs/knowledge and intelligence JSON exist; not executed |

| 21 | 21 Ops maturity | PARTIAL | Mission-control JSON present; telemetry hash not reproduced |

| 22 | 22 Performance | NOT_RUN | No runtime/perf measurements this audit |

| 23 | 23 Complexity | MEASURED | LOC and import-edge counts only; no cyclomatic tool run |

| 24 | 24 Fitness functions | REPORTED | verify-eos is a fitness-like gate for files/JSON, not product fitness |

| 25 | 25 Projects | PARTIAL | 6 registry projects; Fundacion/ empty; Windows paths invalid here |

| 26 | 26 History | MEASURED | 11-day burst 2026-08-10..21; 75 commits |

| 27 | 27 Risk management | PARTIAL | Registers exist; several are stale or self-certifying |

| 28 | 28 Production readiness | NOT_READY | PRODUCTION_READY=NO consistently reported; this audit agrees |

29	29 Epistemic honesty	PARTIAL	Constitution requires labels; live files still publish stale pass-counts
----	----------------------	---------	--

43. Verdict

D — NOT_READY

Only allowed letters: A/B/C/D/E. Selected: **D**.

Proof (conjunctive):

1. Production dictamen is NO (REPORTED, consistent) and this audit found no measured basis to upgrade it.
2. Product tests were NOT_RUN; therefore no REPRODUCED functional baseline on 24b69689.
3. Live “health” numbers are CONTRADICTED across artifacts (§46).
4. Security matrix and CORE-freeze path do not match the tree (CONTRADICTED).
5. `verify:strict` **does** pass (471/471 MEASURED) — this prevents an **E** (total collapse) but is a file/JSON gate, not an operating system in production.

Why not C: C would require a reproduced local runtime or freeze suite on this HEAD. We do not have it.

Why not E: Kernel source exists; verifier passes; git is intact; L0 dependency surface is clean.

44. Most important numbers

Number	Meaning	Class	Source
471	verify:strict checks passed	MEASURED	raw/cmd_verify_strict.*
0	verify:strict failures	MEASURED	same
32	verify:strict duration ms	MEASURED	meta
777	static test()/it() calls	MEASURED	test_static_inventory
132	test-like files	MEASURED	same
1046	product files excl. this report	MEASURED	product_baseline_inventory
651	docs files	MEASURED	same
22	src files	MEASURED	same
6323	src lines	MEASURED	loc_inventory
15978	scripts lines	MEASURED	loc_inventory
75	commits	MEASURED	git rev-list
20	MCP tools declared	OBSERVED	mcp_canonical_tools
3	duplicate kernel basenames	MEASURED	duplicate_module_basenames
84	docs/evidence JSON files	MEASURED	evidence_files
0	npm dependencies	OBSERVED	package.json
0	<code>.missions</code> present	OBSERVED	ls
0	Fundacion child files	OBSERVED	ls
0	hits for string 726/726	MEASURED	claim_string_hits

D	verdict	INFERRED	\$43
---	---------	----------	------

45. Provenance

Canonical machine dataset: EOS_MASTER_SYSTEM_DATA.json.

Spreadsheets: EOS_MASTER_SYSTEM_METRICS.csv (44 rows; must match this markdown).

Graphs: EOS_MASTER_DEPENDENCY_GRAPH.json.

Index: EOS_MASTER_EVIDENCE_INDEX.json.

Raw traces: raw/ (see §53).

46. Contradiction register

ID	Claim A	Claim B / observation	Label
CX-01	CURRENT_STATE 663 / 663 PASS	No test run; static 777 calls; freeze 20/20	CONTRADICTED
CX-02	scripts/cli/eos.js fallback 608 / 608 PASS	Same as CX-01	CONTRADICTED
CX-03	Many audits 472/472 verify:strict	This run 471/471	CONTRADICTED
CX-04	Freeze main = 78b28d6	HEAD 24b6968	CONTRADICTED
CX-05	Step-9 remediations on synthesisEngine / executionOrchestrator	Files absent	CONTRADICTED
CX-06	RISK.json scripts/engine/core FROZEN	Directory absent	CONTRADICTED
CX-07	ACTIVE_TOOLS MCP CONNECTED	Not observed; Windows engram	CONTRADICTED
CX-08	Previous memory 726/726 tests	0 hits in tree	CONTRADICTED
CX-09	Previous memory / greeting 615/615	0 hits as live metric	CONTRADICTED
CX-10	CURRENT_MISSION tests 20/20 at merge	HEAD moved; suite NOT_RUN	CONTRADICTED as *current* fact
CX-11	CORE FROZEN	HEAD includes post-freeze MCP wiring in src/	CONTRADICTED if freeze means $\Delta=0$ on src/core
CX-12	PRODUCTION_READY inside EVD-0033/34	System dictamen PRODUCTION_READY NO	CONTRADICTED if read as global

PRODUCTION_READY=NO as a *system* dictamen is **not** contradicted — it is **consistent** and this audit agrees.

CORE frozen as a *policy slogan* is contradicted by (a) missing freeze path, (b) HEAD $\neq$ freeze SHA, (c) src/core is the real kernel and changed after freeze docs.

47. Unknown register

ID	Unknown	Why
U-01	Pass/fail of npm test on this HEAD	NOT_RUN
U-02	Pass/fail of freeze 20-test suite on 24b6968	NOT_RUN
U-03	Coverage	NOT_RUN
U-04	Whether ATS commitTransition is the sole writer at runtime	NOT_RUN
U-05	Live MCP handshake results	NOT_RUN
U-06	GAP-002 official legal/banking facts	BLOCKED / UNKNOWN (by policy)
U-07	Cause of 472 vs 471 verify drift	NOT_RUN (no bisect)
U-08	Meaning of last_telemetry_hash	NOT_RUN
U-09	Whether BUDGET.json numbers were ever measured	UNKNOWN
U-10	EOS-Lab sqlite DB integrity	NOT_RUN
U-11	Cyclomatic complexity	NOT_RUN

U-12	Production/network behavior	BLOCKED / NOT_OBSERVED
------	-----------------------------	------------------------

48. Top 20 findings

ID	Pol	Title	Class
----	-----	-------	-------

| F01 | POS | verify:strict executed 471/471 PASS exit 0 in 32 ms | MEASURED |

| F02 | POS | Mission OS kernel modules exist under src/core (22 JS files, 6323 lines) | MEASURED |

| F03 | POS | package.json has zero npm dependencies; L0 builtins policy matches observation | OBSERVED |

| F04 | POS | PRODUCTION_READY=NO is consistent across CURRENT_MISSION and freeze docs | REPORTED |

| F05 | POS | GAP-002 remains labeled UNKNOWN in mission-control and unknown register | REPORTED |

| F06 | POS | Git history is short, linear, tagged RC; start working tree was clean | MEASURED |

| F07 | POS | MCP tool table in src is enumerable (20 tools) with deny-by-default comments | OBSERVED |

| F08 | POS | HITL human-only action set is explicit in source | OBSERVED |

| F09 | NEG | System health numbers contradict each other (20 / 471 / 472 / 608 / 663 / static 777) | CONTRADICTED |

| F10 | NEG | 726/726 and 615/615 previous-memory claims are not in this tree | CONTRADICTED |

| F11 | NEG | Security matrix remediates nonexistent src/core modules | CONTRADICTED |

| F12 | NEG | Freeze status pins main=78b28d6; actual HEAD=24b6968 | CONTRADICTED |

| F13 | NEG | ACTIVE_TOOLS.json reports MCP CONNECTED; not observed on this VM | CONTRADICTED |

| F14 | NEG | Dual FSM/HITL/evidence engines (src vs scripts) | OBSERVED |

| F15 | NEG | Fundacion/ is empty; registry points at Windows path | OBSERVED |

| F16 | NEG | RISK.json freezes scripts/engine/core which does not exist | CONTRADICTED |

| F17 | UNKNOWN | npm test / coverage / CLI runtime / MCP stdio smoke not run this audit | NOT_RUN |

| F18 | UNKNOWN | Whether 20/20 freeze tests still pass on 24b6968 is unknown | NOT_RUN |

| F19 | UNKNOWN | BUDGET.json usage figures have no measurement chain here | REPORTED |

F20	CONTRADICTED	Documented CORE freeze locations do not match a single existing kernel directory	CONTRADICTED
-----	--------------	--	--------------

Chart: charts/findings_polarity.svg

49. Top 20 recommendations (tied to findings)

ID	Tied to	Recommendation
REC01	F09	Remove or timestamp-lock all live test-health strings; single measured source or NONE
REC02	F10	Never restore 726/726 or 615/615 without a new MEASURED run
REC03	F11	Quarantine EOS_STEP_9_SECURITY_MATRIX.json as HISTORICAL / NOT_APPLICABLE_TO_CURRENT_TREE
REC04	F12	Rewrite freeze gate docs to current HEAD or mark SUPERSEDED
REC05	F03	Keep L0 no-dep policy until a lockfile gate exists
REC06	F17	Create a declared non-mutating test subset (tmp workdir only) and run it under evidence
REC07	F18	Re-run the freeze 4-file suite in an isolated tmp dir; record exit and SHA
REC08	F14	Declare one authoritative kernel path; mark the other DEPRECATED in code not just docs
REC09	F13	Change ACTIVE_TOOLS MCP status from CONNECTED to CONFIGURED or UNKNOWN until a live handshake
REC10	F15	Keep Fundacion empty until GAP-002 official source; do not infer legal data
REC11	F16	Point CORE-freeze monitors at src/core (or the real path), not scripts/engine/core
REC12	F05	Leave GAP-002 UNKNOWN; do not close from web inference
REC13	F19	Treat BUDGET.json current_usage as demo/stale until a ledger backs it
REC14	R-P1-05	Stop mkdir in MissionRuntime constructor; create on first write

| REC15 | F20 | Publish a one-page ACTUAL architecture that names src/core as Mission OS and scripts/engine as legacy/lab |

| REC16 | F01 | Keep verify:strict but label it FILE_JSON_GATE not test health |

| REC17 | F07 | Do not claim eos.provider.* operational; mcp-status already lists them not_configured |

| REC18 | F04 | Retain PRODUCTION_READY=NO until measured runtime + security + tests exist |

| REC19 | R-P2-05 | Human-review the 10 heuristic secret-hit files |

REC20	F06	Pin this audit SHA in any future health dashboard
-------	-----	---

These are **recommendations**, not completed work. This mission forbids product refactors.

50. Fifteen executive questions

#	Question	Answer	Class	Proof
---	----------	--------	-------	-------

| 1 | Is EOS production ready? | **NO** | REPORTED+OBSERVED |
CURRENT_MISSION.dictamen.PRODUCTION_READY=NO; RELEASE_CAPABILITY_MATRIX; this audit verdict D |

| 2 | Is EOS complete for local governed use? | **PARTIAL** | REPORTED/NOT_RUN | Freeze docs say YES at 20/20 on older tip; this audit did not reproduce those tests on 24b6968 |

| 3 | Does a real Mission OS kernel exist in src/? | **YES** | OBSERVED | 22 files including mission-runtime.js, ATS, FSM, HITL |

| 4 | Did this audit run the product test suite? | **NO** | NOT_RUN | Mutation risk; marked NOT_RUN |

| 5 | Did any automated gate pass here? | **YES** | MEASURED | verify:strict 471/471 exit 0 |

| 6 | Are published test-health numbers trustworthy? | **NO** | CONTRADICTED | 20 vs 471 vs 472 vs 608 vs 663 vs static 777 |

| 7 | Is CORE frozen as a single inode? | **UNKNOWN** | CONTRADICTED | Claims FROZEN; scripts/engine/core missing; src/core exists and HEAD moved after freeze docs |

| 8 | Is PRJ-FUNDACION operational? | **NO** | OBSERVED | Empty Fundacion/; Windows path absent |

| 9 | Is GAP-002 resolved? | **NO** | REPORTED | MASTER_UNKNOWN_REGISTER UNK-GAP-002 UNKNOWN |

| 10 | Are third-party MCPs connected here? | **UNKNOWN** | NOT_OBSERVED | ACTIVE_TOOLS says CONNECTED; no handshake; engram.exe Windows path |

| 11 | Is there an npm lockfile / installed deps? | **NO** | OBSERVED | no package-lock.json; no node_modules; no dependencies field |

| 12 | Can we claim 726/726 or 615/615 tests? | **NO** | CONTRADICTED | Strings absent in tree; previous memory only |

| 13 | Is security Step-9 matrix applicable to current src/core? | **NO** | CONTRADICTED | Target files do not exist |

| 14 | Should the board authorize production or client writes? | **NO** | NOT_READY | Verdict D; write barrier; empty/unknown legal target |

15	What is the single best next measurement?	Isolated freeze-suite replay	HYPOTHESIS	Smallest documented suite (4 files, historically 20 tests) in tmp workdir
----	---	------------------------------	------------	---

51. Ultimate question

Should EOS be treated as an operational, production-capable autonomous engineering system today?

Answer: NO

Qualifier: PARTIAL as a local, documentation-heavy control-plane codebase with an observed Mission OS kernel and a measured file/JSON gate.

Classification: NOT_READY

Proof:

- PRODUCTION_READY=NO (REPORTED, consistent)
- npm test NOT_RUN this audit
- Health telemetry CONTRADICTED
- Security matrix CONTRADICTED vs tree
- verify:strict MEASURED but is not a runtime
- Fundacion empty; GAP-002 UNKNOWN

52. Command ledger
